animal companions explores how eighteenth century british society perceived pets and the ways in which conversation

about them reflected and shaped broader cultural debates while europeans kept pets long before the eighteenth century many believed that doing so was at best frivolous and at worst downright dangerous ingrid tague argues that for britons of the eighteenth century pets offered a unique way to articulate what it meant to be human and what society ought to look like with the dawn of the enlightenment and the end of the malthusian cycle of dearth and famine that marked previous eras england became the wealthiest nation in europe with a new understanding of religion science and non european cultures and unprecedented access to consumer goods of all kinds these transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human animal relationships drawing on a broad array of sources including natural histories periodicals visual and material culture and the testimony of pet owners themselves animal companions shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century britain
