during the recent decades social political and academic endeavours have been made to improve environmental quality and reduce pollution in particular the ocean sea and coastal areas show varying degrees of impact from the multiple human activities carried out in the terrestrial as well as in the aquatic environment ecology is a science which studies the relationship between organisms and the surrounding environment and in the modern era the marine world is getting increasing attention for centuries it has been the final reservoir of human garbage later it became an oil farm with a concomitant increase of coastal population growth and unplanned growth of the fishing industry and the increasing use of sea routes for cargo transport and recreational uses cruises all this led to rising contamination with negative effects on biota and even human health it is then imperative to know the current situation of the world s oceans that is the main purpose of this book to document at a glance the latest research in the field of ocean pollution

this contributed volume gives a state of the art overview of microplastics and nanoplastics mps and nps in soils and their relationship with growing plants through chapters contributed by a wide variety of researchers the book

offers readers an understanding of mp and np adsorption uptake and effects as well as implications for trophic transmission food safety and security cutting edge topics such as trophic transfer and remediation of mps and nps in soil samples are also addressed the book begins with a primer on terrestrial mps and nps their effects on terrestrial plants and how these contaminants affect human populations from there the volume is split into four sections which address both problems caused by mps and nps in soil and potential remediation solutions the first section deals with the mechanics of how mps and nps pollute soils and how toxic chemicals affect the soil profile and its flora fauna and microbes the second section of the book discusses trophic transfer of mps and nps from roots to shoot shoot to leaves and then to fruits the third section details the threats to humans that are present as a result of mps and nps in soils the fourth and last section gives covers bioremediation techniques that can be employed in order to reclaim polluted soils

finally available a high quality book of the original classic edition of the book of the aquarium and water cabinet or practical instructions on the formation stocking and mangement in all seasons of collections of fresh water and marine life it was previously published by other bona fide publishers and is now after many years back in print this is a new and freshly published edition of this culturally important work by shirley hibberd which is now at last again available to you get the pdf and epub now as well included in your purchase you have the book of the aquarium and water cabinet or practical instructions on the formation stocking and mangement in all seasons of collections of fresh water and marine life in epub and pdf format to read on any tablet ereader desktop laptop or smartphone simultaneous get it now enjoy this classic work today these selected paragraphs distill the contents and give you a quick look inside the book of the aquarium and water cabinet or practical instructions on the formation stocking and mangement in all seasons of collections of fresh water and marine life look inside the book i have done my best to explain and illustrate the whole rationale of marine and fresh water tanks in my lately published work rustic adornments for homes of taste but since that work owing to the expense incurred in its

production is published at a price which every lover of the aquarium cannot command i have thought it no less a duty than a pleasure to treat the subject more briefly but still practically and i hope profitably in a volume of less dimensions and less cost written for another class of readers but this plan is not the only one that may be followed and if well washed pebbles be used instead of mould as i have advised the fishes may be introduced the same day as the plants are inserted by first taking care that you insert plenty of large healthy plants and then throw on the top as much of the brook starwort callitriche autumnalis as will cover the whole it is necessary to get a good supply of starwort from a brook throw it into a large vessel of clear water pick off the green heads with four or six inches of stem only to each then wash all these picked portions till they are bright and clean and throw the whole into the tank to take its chance
